1	INTRODUCTION.....	6
2	RESEARCH OVERVIEW.....	8
2.1	MULTIPROCESSOR SYSTEMS.....	8
2.2	FAULT TOLERANCE	12
2.3	FT RECONFIGURATION AND RELATED RESEARCH AREAS	14
2.3.1	<i>Reconfiguration from hardware viewpoint.....</i>	<i>14</i>
2.3.2	<i>Reconfiguration from software viewpoint.....</i>	<i>16</i>
2.3.3	<i>Scheduling and mobility of software elements.....</i>	<i>19</i>
2.4	OVERVIEW CONCLUSION	22
2.5	RESEARCH STARTING-POINTS	23
3	THESIS OBJECTIVE	24
4	THESIS METHODOLOGY	25
5	DATA DRIVEN GRAPH	27
5.1	WHAT IS DDG?	28
5.2	DDG TASKS AND VARIABLES.....	29
5.3	GRAPHICAL REPRESENTATION	32
5.4	DDG ARCHITECTURE	33
5.5	DDG APPLICATION PROGRAMMING INTERFACE	35
5.6	COMPARISON WITH ANOTHER MODELS AND EXISTING APPROACHES	37
5.7	CONCLUSION ON DATA DRIVEN GRAPH	38
6	FAULT TOLERANCE IN DDG ENVIRONMENT.....	39
6.1	FAULT-TOLERANT ENVIRONMENT OVERVIEW.....	40
6.2	DATA AND CHECKPOINT MANAGEMENT	41
6.2.1	<i>Complete data checkpointing</i>	<i>41</i>
6.2.2	<i>Removing obsolete data.....</i>	<i>45</i>
6.2.3	<i>Recovery losing checkpoints</i>	<i>47</i>
6.2.4	<i>Partial data checkpointing.....</i>	<i>47</i>
6.2.5	<i>Combined data checkpointing.....</i>	<i>49</i>
6.3	FAULT DIAGNOSTICS	51
6.4	TASK RECONFIGURATION.....	52
6.4.1	<i>Control of reconfiguration</i>	<i>52</i>
6.4.2	<i>Reconfiguration module.....</i>	<i>54</i>
6.4.3	<i>Task reallocation</i>	<i>55</i>
6.5	CONCLUSION ON FAULT-TOLERANT DDG ENVIRONMENT	57
7	IMPLEMENTATION OF FAULT-TOLERANT ENVIRONMENT	58
7.1	DATA STRUCTURES AND TASK OBJECTS	59
7.1.1	<i>Data structures</i>	<i>59</i>
7.1.2	<i>Task objects</i>	<i>60</i>
7.1.3	<i>Data and checkpoint management.....</i>	<i>61</i>
7.2	TASK RECONFIGURATION.....	64
7.2.1	<i>Initialization.....</i>	<i>65</i>
7.2.2	<i>Mapping states.....</i>	<i>66</i>
7.2.3	<i>Computing a new configuration.....</i>	<i>67</i>
7.2.4	<i>Applying the new configuration.....</i>	<i>67</i>
7.2.5	<i>Recovery losing communications of the last task on the faulty node</i>	<i>68</i>
7.3	FAULT DIAGNOSTICS	69
7.4	SUMMARY	70

8	CASE STUDY	71
8.1	HARDWARE PLATFORM	71
8.2	GAUSSIAN ELIMINATION ALGORITHM (GEM)	72
8.3	SCHEDULING AND RECONFIGURATION ALGORITHMS	75
8.4	APPLICATION PERFORMANCE IN FT DDG ENVIRONMENT WITHOUT FAULT OCCURRENCE	76
8.4.1	<i>Application speedups in FT DDG environment</i>	76
8.4.2	<i>Fault-tolerant additional overheads</i>	77
8.5	PARTIAL VERSUS COMBINED CHECKPOINTING	79
8.6	USER-DEFINED VERSUS DEFAULT DDG RECONFIGURATION ALGORITHM	81
8.7	SUMMARY	83
9	THESIS EVALUATION	84
10	CONCLUSION	86
	APPENDIX	88
	LIST OF ACRONYMS	88
	LIST OF DEFINITIONS	90
	LIST OF RULES	90
	LIST OF THEOREMS	90
	LIST OF ILLUSTRATIONS	91
	LIST OF TABLES	93
	BIBLIOGRAPHY	94
